Summary

Data Engineer with 5 years of experience building ETL/ELT pipelines and delivering reporting solutions for healthcare and financial services. Skilled in Snowflake, dbt, Databricks, Delta Lake and Azure Data Factory. Focused on data quality and CI/CD deployments and experienced with lakehouse architectures that reduce manual reconciliation and improve stakeholder reporting reliability.

Professional Experience

Data and System Analytics Associate (Part-Time)

12/2025 – 05/2026

Universitätsklinikum Heidelberg, Heidelberg, Germany

- Built REST API ingestion pipelines between qTest and Matrix42 into Snowflake staging tables and reduced manual weekly reporting effort by 35% for healthcare IT incident and service request analytics.
- Developed dbt reporting marts with automated source freshness checks and data quality tests that improved SLA reporting reliability by 30% for weekly operational dashboards.
- Implemented CI/CD gates using GitHub Actions for SQL validation dbt test execution and deployment checks which eliminated broken reporting releases before stakeholder updates.

Senior Software Engineer

03/2019 – 10/2023

Hexaware Technologies Pvt. Ltd., Navi Mumbai, India

- Led ETL/ELT delivery on Azure Data Factory and ADLS across 22 financial portfolio applications and supported AUM performance reporting using incremental pipeline triggers, retry logic and failure alerts.
- Migrated Parquet based Bronze Silver and Gold layers to Delta Lake. Enabled ACID transactions and time travel for simpler historical reconciliations and reduced month end reconciliation effort by 30
- Automated 60% of Excel based reporting refreshes using Python and SQL and improved dashboard refresh reliability and reduced manual data preparation for the finance reporting team.

Projects

Smart Energy Forecasting Pipeline, Master's Thesis

04/2025 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

- Built an end to end ADLS Bronze Silver Gold lakehouse pipeline and dbt models with automated tests to produce forecasting ready datasets.
- Delivered ML ready datasets and decision metrics that identified 12% potential energy savings.

DB Train Delay and Route Reliability Pipeline

05/2026 – 06/2026

Personal Project - GitHub

- Built a German train delay lakehouse pipeline using API ingestion, Kafka events, Bronze JSON/Parquet storage, PySpark transformations and dbt Silver/Gold models for 11+ route reliability KPIs.
- Improved data quality by 25% by adding duplicate detection, late arrival handling, missing route validation, Airflow orchestration, Terraform setup and GitHub Actions CI/CD checks.

Education

M.Sc. Applied Data Science and Analytics

10/2023 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

Technical Skills

Programming & Querying: Python, SQL, PySpark

Cloud & Data Platforms: Azure Data Factory, Azure Data Lake Storage, Snowflake, Databricks, SQL Server

Lakehouse & Storage: Delta Lake, Parquet, ACID Transactions, Time Travel

Data Engineering & Automation: ETL/ELT, dbt, Apache Airflow, GitHub Actions, Docker, Terraform

Streaming & Soft Skills: Apache Kafka, Stakeholder Communication, Troubleshooting, Reliability Mindset

Languages

English: C1 (Professional working proficiency) | **German:** B1 (actively improving, B2 target)

Certificates

Microsoft Azure Fundamentals (AZ-900) | **Databricks** for Data Engineering | **NVIDIA** Deep Learning Fundamentals
