Summary

Data Engineer with 5 years of experience building data pipelines and reporting solutions across healthcare IT and financial services. Skilled in Python, SQL, PySpark, Azure Data Factory, Snowflake, dbt, Airflow, Kafka and CI/CD workflows. Experienced in ETL/ELT, lakehouse pipelines, data quality checks and Power BI reporting. Focused on building reliable data systems that reduce manual work and improve reporting accuracy.

Professional Experience

Data and System Analytics Associate (Part-Time)

12/2025 – 05/2026

Universitätsklinikum Heidelberg, Heidelberg, Germany

- Reduced manual weekly reporting effort by 35% by building REST API ingestion pipelines between qTest and Matrix42 for healthcare IT incident, service request and test execution analytics.
- Improved SLA reporting reliability by 30% by developing Snowflake staging tables, dbt reporting marts, source freshness checks and automated data quality tests for weekly operational dashboards.
- Reduced broken reporting releases by adding GitHub Actions CI/CD gates for SQL validation, dbt tests and deployment checks before stakeholder reporting updates.

Senior Software Engineer

03/2019 – 10/2023

Hexaware Technologies Pvt. Ltd., Navi Mumbai, India

- Led Azure Data Factory, ADLS, Azure SQL and Power BI reporting delivery across 22 financial portfolio applications for AUM performance reporting.
- Reduced month-end reconciliation effort by 30% by implementing incremental ETL/ELT pipelines with ADF triggers, retry logic, failure alerts and SLA monitoring.
- Automated 60% of Excel-based reporting refreshes using Python, SQL and Parquet based Bronze, Silver and Gold layers on ADLS, improving dashboard refresh reliability.

Projects

Smart Energy Forecasting Pipeline, Master's Thesis

04/2025 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

- Built an end to end ADLS Bronze Silver Gold lakehouse pipeline and dbt models with automated tests to produce forecasting ready datasets.
- Delivered ML ready datasets and decision metrics that identified 12% potential energy savings.

DB Train Delay and Route Reliability Pipeline

05/2026 – 06/2026

Personal Project - GitHub

- Built a German train delay lakehouse pipeline using API ingestion, Kafka events, Bronze JSON/Parquet storage, PySpark transformations and dbt Silver/Gold models for 11+ route reliability KPIs.
- Improved data quality by 25% by adding duplicate detection, late arrival handling, missing route validation, Airflow orchestration, Terraform setup and GitHub Actions CI/CD checks.

Education

M.Sc. Applied Data Science and Analytics

10/2023 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

Technical Skills

Programming & Querying: Python, SQL, PySpark, REST APIs

Data Engineering: ETL/ELT, Data Pipelines, dbt, Airflow, Kafka, Data Quality, CI/CD

Cloud & Platforms: Azure Data Factory, Azure Data Lake Storage, Snowflake, Terraform, Docker, GitHub Actions

Data Modelling: Medallion Architecture, Parquet, Reporting Marts, Star Schema

Soft Skills: Stakeholder Communication, Ownership, Problem Solving, Cross-team Collaboration, Reliability Mindset

Languages

English: C1 (Professional working proficiency) | **German:** B1 (actively improving, B2 target)

Certificates

Microsoft Azure Fundamentals (AZ-900) | **Databricks for Data Engineering** | **NVIDIA Deep Learning Fundamentals**
