Summary

Azure Data Engineer with 5 years of experience building ETL/ELT pipelines on Azure, integrating REST APIs and supporting CI/CD workflows. Hands-on in Python, SQL, Azure Data Factory and Data Lake with a focus on data quality, automated validation and business reporting. Delivered compliant data solutions for finance and healthcare domains. Familiar with DSGVO/GDPR requirements.

Technical Skills

- **Languages & Core:** Python, SQL, PySpark, Pandas, NumPy, DAX, Flask, FastAPI
- **Cloud & Pipelines:** Azure Data Factory, Azure Data Lake, Azure SQL, Azure Storage, Databricks, ETL/ELT, CI/CD (Azure DevOps)
- **Data Engineering:** Data Warehousing, Data Modeling, Delta Lake, Data Quality, Parquet, Data Validation, Airflow, dbt, REST API Integration
- **BI & Analytics:** Power BI, Tableau, KPI Design, DAX
- **Tools & Compliance:** Git, Jira, SAP Fiori, DSGVO/GDPR awareness
- **Learning / Expanding:** Kubernetes, Terraform

Professional Experience

Data and System Analytics Associate (Part-Time)

12/2025 – Present

Universitätsklinikum Heidelberg, Heidelberg, Germany

- Engineered automated ETL pipelines integrating Matrix42 (ticketing) and qTest (QA) data via REST APIs and SQL transformations, producing structured datasets for incident and test analytics which reduced weekly manual reporting effort by 20% for 5 service teams.
- Architected migration of legacy flat-file workflows to Azure Data Lake using Azure Data Factory with incremental load patterns and schedule-based triggers that enabled real-time KPI dashboards tracking SLA breaches and recurring incidents, eliminating 8 hours of monthly manual data preparation.

Senior Software Engineer - Data Engineering Focus

03/2019 – 10/2023

Hexaware Technologies Pvt Ltd., Navi Mumbai, India

- Orchestrated end-to-end data delivery for 22 financial applications by designing ADF-based ETL pipelines on Azure Data Lake, incorporating automated validation checks and CI/CD deployment via Azure DevOps and achieving 100% SLA compliance (zero breaches) over 6 months for US and EU portfolio teams.
- Automated manual Excel-based reporting (AUM, portfolio exposure, performance views) into Power BI-ready datasets and saved 10 hours of weekly reconciliation work for investment analysts.
- Designed medallion architecture (raw - processed - curated) in Azure Data Lake, enabling self-service data access for US portfolio teams reducing manual data handling requests by 10% and cut reporting access time from 20 hours to 4 hours.

Education

Master's in Applied Data Science and Analytics

10/2023 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

Bachelor of Science in Information and Technology

07/2015 – 04/2018

KES Shroff College, Mumbai, India

Projects

Master's Thesis – Smart Electricity and Energy Optimizer Usage

04/2025 – 09/2025

SRH Hochschule Heidelberg, Heidelberg, Germany

- Built an end-to-end Python and PySpark pipeline on GCP (Cloud Run, Pub/Sub, Dataflow, BigQuery) to ingest, clean and integrate electricity and solar consumption data to prepare time-series datasets for forecasting and cost optimisation, identifying potential savings of 10–12% across building profiles.
- Stored processed data in Parquet format with Delta Lake concepts (simulated) to enable time-travel and efficient incremental processing, and developed modular forecasting workflows with parameterised paths and aggregation windows.

Languages

English – Fluent (C1) German – Intermediate (B1, actively learning toward B2)

Certificates

Microsoft Azure Fundamentals (AZ-900) | NVIDIA Deep Learning Fundamentals | SAS Certified Specialist: Visual Business Analytics
